---

National HQ is proud to announce the activation of the CAP Safety Specialty Track Training on the Safety website at [http://level2.cap.gov/visitors/programs/safety/basic\\_safety\\_course/](http://level2.cap.gov/visitors/programs/safety/basic_safety_course/).

The on-line Basic Safety Course and Test replaces the Air Force Institute for Advanced Distributed Learning (AFIADL) Course 02170, Civil Air Patrol Safety Officer Course. Those who have already completed the old AFIADL course do not have to complete the new on-line course.

Look for the Senior and Master Safety courses on-line in the near future.
